

Script for Instant Data Scraper

We used Instant Data Scraper for scrapping the data of 5000 used cars from CarDekho website

1-Install the Instant Data Scraper from the Chrome Store using Google.

2-It will be added to the browser as an extension.

3-Open the website (Car Dekho) and fill the required details and search.

4- Open the scraper using extension.>>details of the first page will be scrapped>>click on next button>>click on scrawling, so it can move to next page>>once the required details are scrapped click on stop scrawling.

5- Now save the file by clicking on save as csv or xls on the scraper window.

6-The file will be saved to given destination.
